

fws presents...

Permaculture Design Certificate (PDC) Course

Tanzania - June 2013

Following the success of our 2012 PDC, fws is pleased to offer you the chance to join USA based instructor **Steve Whitman** and a team of local teachers in **Arusha, Tanzania** from **June 17th to 28th 2013** for two weeks of intensive learning, an incredible networking opportunity, and an internationally recognised qualification.

You'll gain direct permaculture design experience through Kesho Leo's farms and other projects in the Arusha region, while sharing this experience with a diverse group of the international community; from farmers to NGO workers, teachers to lodge managers.

Permaculture is a framework for working towards greater sustainability and self-reliance. It is these principles that underpin the Kesho Leo systems, and not only work to meet the needs of Kesho Leo's residents, but also provide opportunities for community education and income generation.

Throughout this PDC you'll learn hands-on from our livestock, organic vegetable gardens and aquaculture ponds, food forests and poultry systems, compost toilets and rainwater harvesting systems; all while supporting the promotion of self-reliance within Africa.

For more information visit: www.foodwatershelter.org.au/pdc.aspx
and to secure a place early, contact: pdc@foodwatershelter.org.au

Opportunities exist for course sponsorship to assist the attendance of African students, who will make up at least half the course numbers.

We will also be hosting the

WORLD'S FIRST KNOWN KISWAHILI PDC

in April 2013, in conjunction with the [PRI Kenya](http://www.prikenya.org). Please visit www.foodwatershelter.org.au/pdc.aspx for further details.

Our 2012 PDC was attended by a wide range of participants - here's what some had to say about their experience:

"Steve was an excellent trainer. It was a great experience, an amazing way to build connections with people from all walks of life. I'm so happy I did it!"

"The course was great. Charles is now a Permaculture maniac and is lecturing at the clinic in his village. We have started a research farm & the course has had a major impact on our design."
