Permaculture Design Certificate: JAN/FEB 2015

Learn how to design sustainable, resilient human and agricultural systems

Join us January 25 through February 5, 2015 in Arusha for this wonderful learning opportunity led by teaching team, Janet Maro of Sustainable Agriculture Tanzania, Nicholas Syano of PRI- Kenya and Nyumbani Village and USA based teacher Lindsay Allen of Foodwatershelter and Quail Springs Permaculture.

This course will give you internationally recognised certification, you’ll gain hands-on experience designing and working on the farms of Kesho Leo, have the opportunity to visit projects and other NGOs in the Arusha area, and meet a diverse group of the international community. Scholarships will be available to African students who will make up half the number.

Permaculture is a framework for working toward greater sustainability and self-reliance. It is these principles that underpin the Kesho Leo systems not only working to provide the needs of Kesho Leo residents, but also to provide community educational opportunities and create income. Through this PDC you’ll learn hands-on from our livestock, organic vegetable gardens and aquaculture ponds, food forests and poultry systems, compost toilets and rainwater systems; all while supporting the promotion of self reliance within Africa.

Cost: $850 USD, Local scholarships and group discounts available

FOR MORE INFORMATION PLEASE VISIT www.foodwatershelter.org.au/pdc.aspx and to secure a place early, contact pdc@foodwatershelter.org.au

This is a great opportunity for you or your staff to gain skills in, community building, holistic management & thinking, energy efficiency and self reliance.
