Matt Kilby 0418 654 231

Hosted by

This unique field day will give you a firsthand look at how biodiversity can be significantly enhanced on farm by embracing important farmscaping techniques. The Field Day will include presentations, demonstrations and farm walks, where you can see for yourself how farmland can be bought 'back to life'.

Matt Kilby - of *Global Land Repair* will be focussing on sustainable land practices and growing trees to increase profitability on farms. Matt will discuss the importance of biodiversity in farm scapes including the real cost of growing trees and what trees need for healthy growth. (www.globallandrepair.com.au)

Graeme Sait – is an author / consultant who co-founded Nutri-Tech Solutions (NTS) – a world leader in Biological agriculture. Graeme will focus on soil fertility, plant nutrition, plant protection and the powerful link between soil biology and productivity. (www.nutri-tech.com.au)

Nicholas Huggins – a Permaculture Consultant and Designer with Global Land Repair will be discussing Permaculture, Keyline ploughing to decompact soil, water harvesting and regenerative farm design. Nick will also lead a farm walk and explain the current project at Nambrok. (www.globallandrepair.com.au)

Gerhard Grasser - Managing Director of AgriSolutions Pty Ltd will share his knowledge and passion on sustainable regenerative agricultural practices and the use of natural inputs including composting and actively aerated compost tea. (www.agriculturalsolutions.com.au)
