

Invitation to the launch of *Permaculture Sydney South* by Geoff Lawton

The Power of Permaculture:

Designing sustainable cities around the world

Permaculture Sydney South is the regional permaculture group covering the central, southern and eastern Sydney region. Currently it is made up of several local group hubs - City, Eastern suburbs, St George, Sutherland & Inner West. Come to celebrate our official launch with Geoff Lawton and join one of our local groups.

Geoff Lawton, international permaculturist has travelled the globe for almost 30 years, sharing the teachings of permaculture with individuals, families, communities, cities and nations. His consistent application of permaculture principles has transformed environmental, social and economic systems globally.

Hear about the same principles that Geoff applies in diverse settings: **from**

Greening the desert in Jordan

&

Transforming Macedonian refugee camps into **self-reliant communities**

to

Designing **sustainable cities** in the Middle East and The Americas.

Learn how we can apply permaculture principles in the city and suburbs.
