Website: www.nawayaegypt.org
INSTRUCTORS:

Rod Everett an organic sheep farmer in North Lancashire, England, his farm hosts The Study Centre of the Middlewood Trust, where many courses on sustainable issues are run. He is interested in all of the little understood properties and potential of water.

Mill Millichap is currently creating a productive garden in the mountains of central Spain. His interest have included, Forest gardening and fruit and vegetable, school gardens, social and environmental activism.

NAWAYA:

A team of young professionals, inspired by the Revolution taking ownership towards Egypt’s future. Proponents that sustainable agriculture is the core driver for productive and regenerative communities that flourish from the bottom-up. Nawaya’s vision is co-creating self reliant, bountiful, Egyptian communities.
